

Aamal Subsidiary APC Launches AI-Powered Maintenance Hub to Drive Innovation and Operational Excellence

Doha, Qatar – 8 June 2026– Aamal Company Q.P.S.C., one of the region's leading diversified companies, is pleased to announce that its subsidiary, Advanced Pipes & Casts Co. ("APC") leading pipes manufacturing company in Qatar, has successfully launched the APC Maintenance Hub, an innovative artificial intelligence-powered platform designed to transform maintenance operations through advanced automation, intelligent analytics, and data-driven decision-making.

Developed in-house by APC, the APC Maintenance Hub represents a significant milestone in the company's digital transformation journey. The platform integrates artificial intelligence into day-to-day maintenance activities, enabling greater efficiency, enhanced asset management, improved troubleshooting capabilities, and streamlined inventory control.

The comprehensive platform allows maintenance teams to manage machines, spare parts, maintenance records, and operational data through a unified digital environment. Leveraging AI-powered functionality, users can generate engineering drawings from images or descriptions, automatically extract technical specifications from machine nameplates, analyze maintenance issues, identify potential solutions, and access real-time operational insights.

The platform also incorporates advanced inventory management tools that automate the processing of delivery notes, invoices, and Excel-based records while helping identify suitable local and international suppliers for spare parts. In addition, its AI-powered analytics capabilities provide managers and engineers with actionable insights into machine performance, maintenance trends, inventory levels, and workforce scheduling, supporting more informed and proactive decision-making.

Commenting on the launch, Mr. Rashid bin Ali Al Masoori, Chief Executive Officer of Aamal, said:

"The launch of the APC Maintenance Hub reflects Aamal's broader strategy of fostering innovation across its businesses and investing in technologies that enhance operational performance, strengthen competitiveness, and support sustainable growth."

The APC Maintenance Hub also features an AI Chat Assistant that enables users to obtain instant responses to maintenance, inventory, and operational queries based on live system data, improving accessibility to information and reducing response times.

Mr. Basil Awwad, Operations General Manager of APC, added: "The APC Maintenance Hub was developed to address real operational challenges and empower our maintenance teams with smarter tools and actionable insights. By automating routine processes, improving access to information, and enabling predictive decision-making, the platform will help us enhance productivity, reduce downtime, and maintain the highest standards of operational excellence."

The launch of the APC Maintenance Hub reflects Aamal's broader strategy of fostering innovation across its businesses and investing in technologies that enhance operational performance, strengthen competitiveness, and support sustainable growth.

Mr. Basil Awwad also expressed his sincere thanks and appreciation to all employees who contributed to the development and implementation of the Maintenance Hub, commending the significant efforts made over the past months to complete this project. He extended special thanks to Eng. Amr Mousa, Head of the Maintenance Department at Advanced Pipes & Casts Company, in recognition of his outstanding efforts, continuous follow-up, and commitment to completing the development of the application and

successfully launching it. Mr. Awwad emphasized that this achievement reflects the spirit of teamwork and collaboration among the various teams and contributes to supporting the company's digital transformation and operational excellence journey.

About Advanced Pipes & Casts Company

Aamal Company owns 100% of Advanced Pipes and Casts Company ("APC"), which was established in 2010 and is recognised as one of the leading pipe manufacturers in the Middle East.

APC operates a highly automated and technologically advanced production facility, enabling strong operational efficiency, consistent product quality, and the flexibility to respond rapidly to evolving end-market demand and project requirements.

The company specializes in the manufacture and supply of concrete pipes and precast concrete products used in infrastructure and civil construction projects. Its products include precast concrete elements for buildings and structures, tunnel segments, bridge components, and concrete sleepers and foundations for railway projects. The company also provides solutions for sewerage and stormwater drainage networks, supporting the development of roads, utilities, and public infrastructure. These products are designed to meet engineering requirements for quality, durability, and long-term performance in a wide range of construction applications. <https://apcaamal.qa/>
